

[Astronomska skupina na FMF](#) vabi v **sredo, 16. maja, ob 13. uri** na Astrodebato, ki jo bo imel **Luca Zampieri** (INAF -

Astronomical Observatory of Padova)

o spremenljivih objektih v kontekstu meritev v optičnem delu svetlobnega spektra, s poudarkom na pulzarjih

. Predavanje bo v predavalnici F2 na Jadranski 19,

[Fakulteta za matematiko in fiziko](#)

, Univerza v Ljubljani. Vljudno vabljeni!

Povzetek:

Our team at the University of Padova and the INAF-Astronomical Observatory of Padova is engaged in the design, construction and operations of instruments with very high time accuracy in the optical band for applications to High Time Resolution Astrophysics and Quantum Astronomy. I will report on recent technological developments and scientific results obtained within the framework of this project, focusing in particular on optical pulsars.
