

V sredo, **27. maja 2020**, bo imel **dr. Jure Japelj** (Anton Pannekoek Institute for Astronomy, University of Amsterdam) astrodebato z naslovom *Challenges in astronomy in the light of satellite constellations*. Predavanje bo potekalo preko Zooma in se začne **ob 12. uri**. Vljudno vabljeni!

Astrodebate organizira [Astronomska skupina na Fakulteti za matematiko in fiziko](#) Univerze v Ljubljani.

Challenges in astronomy in the light of satellite constellations

Private companies will set up a network of new satellites in the low Earth orbit in the next few years. The sudden considerable increase in the number of satellites poses a multifaceted problem. Astronomers are especially alarmed about the negative impact the satellites could have on the astronomical research. I will present the latest developments and discuss whether these swarms of satellites will be a real problem or just a nuisance.

This astrodebata will take place on Zoom. Use the link below to join:
