

V letu 2016 cikel poljudnih predavanj [Sprehod skozi vesolje](#) organiziramo v sodelovanju s [Fakulteto za naravoslovje Univerze v Novi Gorici](#)

in ga izvajamo v nekoliko drugačni preobleki.

Predavanja so vsak mesec od januarja do junija v drugem kraju Slovenije!

Junjsko predavanje bo že v maju! V **četrtek 26. maja 2016 ob 12:00** na [Gimnaziji Murska Sobota](#)

bo **Dr. Tijana**

Prodanović

z Univerze Novi Sad predavala

o superjunakih

Predavanje bo v angleškem jeziku. Vabljeni!

Naslov predavanja:

"Superhero Science"

Povzetek:

Superman can fly, Spiderman can climb walls, Hulk is stronger than any man when he goes green, but what does science say about their superpowers? Could superheroes with super-human abilities possibly exist in nature according to science? Could there really be an X-man out there somewhere, or is Batman the best we can hope for?
